

Rich Wooten
 President and C.E.O.

Rich Wooten & Associates is a Chicago based security organization with home security as one of our top priorities. Owned by a Chicago native and CPD officer, our company knows the importance of security and what happens when that security is violated. We take pride in our ability to provide residents with the means to ensure their belongings are safe and secure. Everyone deserves peace of mind when at home, yet it is necessary when they are not at home.

We would like an opportunity to speak with you about ensuring the safety of your neighborhood. We have no problem with making house calls to give residents safety and security system presentations.

We also have safety and security classes every second and third Saturday of every month. These classes, which are by appointment only, give residents the opportunity to have a hands-on experience with many of our systems.

For additional information or to make an appointment, contact a security system representative at (773) 651-3826.

Camera Security Package

The security of our neighbors and neighborhood is a major concern in these times. With prices and desperation continuously rising, protecting our homes and assets has become one of the top priorities. We work hard for what we have gained and would like to protect what we have. That is where we come in!

PTZ Controlled Camera

What we have to offer are security and surveillance systems that can be custom fitted for your home. We provide anything from motion and door systems, all the way up to recording camera systems that you can view from any internet source.

Benefits of a system includes...

- Watch home while at work or on vacation
- Avoid Burglaries and theft
- Avoid vandalism
- Secure in home assets
- Monitor the activities of your business
- Monitor children View driveway and parking lots
